Site Engineering for Landscape Architects

Fifth Edition

The leading guide to site design and engineering, now fully updated.

The leading choice for site engineering, planning, and construction courses, as well as for practitioners in the field, *Site Engineering for Landscape Architects, Fifth Edition* introduces the principles and techniques of basic site engineering for grading, drainage, earthwork, and road alignment. The Fifth Edition maintains the text's recognized quality, while revising its content to keep readers up to date with current technologies in the field of landscape architecture.

Introducing landform and the language of its design, the text explores the site engineering concepts essential to practicing landscape architecture today—from interpreting landform and contour lines, to designing horizontal and vertical road alignments, to construction sequencing, to designing and sizing stormwater management systems. Integrating design with the construction and implementation processes, the authors provide students with a progressive understanding of the subject matter.

This new edition expands its coverage of such current topics as sustainability, green roofs, bioengineering, and lightweight and structural soils. It also features new case studies, as well as inspiring graphics and color photos with real-world examples.

Perfect for use as a study guide for the most difficult section of the Landscape Architecture Registration Exam (LARE) or as a handy professional reference, *Site Engineering for Landscape Architects, Fifth Edition* gives readers a strong foundation for engaging in site development that is environmentally sensitive and intellectually stimulating.
