The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa Tara Grant

Have you been plagued with boils, cysts, ingrown hairs, and acne-like bumps that take months to resolve, leave embarrassing scars, and cause considerable pain? Have you been to the doctor, only to leave with a prescription for antibiotics, few answers, and little to no hope? Hidradenitis suppurativa (HS) is a poorly understood skin condition that is believed to affect nearly twelve million people in the United States alone. Only a small fraction of those affected have been properly diagnosed, leaving many others to suffer in silence or pursue ill-advised conventional treatment methods that fail to address the cause of this painful condition.

Tara Grant, a twenty-year sufferer of HS, has become an underground legend to her Internet community of HS victims by presenting a methodical, self-tested action plan to heal naturally. The centerpiece of her holistic approach rests on the understanding that HS is an autoimmune disorder caused by leaky gut syndrome. With a few simple dietary changes that eliminate certain “trigger” foods, you can heal your gut, restore your skin, reclaim your health, and rid yourself of HS symptoms forever. That’s it?no antibiotics, no experimental surgeries, and no more pain, suffering, or confusion.

Q&A with Tara

1. What was it about the subject you chose to write about in your book that made you feel so passionate about spreading the word and getting your book published?

My motivation for writing this book was the overwhelming response I received from people on the Internet when I originally posted about it in March of 2012. It turns out it’s a pretty common condition, but many people (and doctors) don’t know what it is. It’s pretty standard to visit various doctors, and be told that you have “acne,” or to be subjected to butchering surgeries. There is no treatment for HS, according to the doctors. People with it suffer immensely?in fact, HS is acknowledged to be one of most painful conditions in the world. I’ve even received letters from doctors and nurses who suffer from HS, thanking me for telling them what it is that they have?and for offering them hope.

The primary motivating factor for writing this book, however, was an email I received from a 12-year old girl, who said she was going to kill herself because of the pain she was in. I immediately wrote her back, but I never heard back from her. I am desperate to know that she’s okay. I don’t want anyone else to go through what I did as a teenager?I myself thought about suicide on more than one occasion. I’ve had many letters from people who say they want to kill themselves since.

2. HS is hard to diagnose, and many doctors aren’t even aware of its existence. How did you get a diagnosis?

I’ve had HS since I was thirteen years old, but wasn’t diagnosed until I was in my mid-30s. Up until then, I saw over forty doctors from four different countries - none of whom could tell me what was wrong with me. I eventually found the name “Hidradenitis suppurativa” in a book about PCOS (also known as polycystic ovarian syndrome, which I also had) and could finally put a name to the horrible condition I had suffered

from for so long. I took that information to a dermatologist. That's when I finally got a diagnosis?over twenty years later. At that time, I had already changed to a Primal diet and my HS was drastically better, so I declined the antibiotics and Accutane the doctor prescribed. I also refused to believe what she said: "You have to live with this for the rest of your life." I knew, as a longtime sufferer of HS, that the doctors I had seen had no clue what they were talking about.

My journey was extremely frustrating, and I went through it completely alone. Over the years, I was told I had "adult acne," and also told that they didn't know what was wrong with me. I was also told that I was overreacting, not keeping clean enough, and told to lose weight. Not a single doctor showed any compassion, or was willing to look into the matter further. I eventually stopped going to the doctors, and didn't return until I had already made changes and knew I was on the right track. I knew that if I wanted answers, I had to do the research and experimentation myself. I wasn't interested in how I reacted to different drug, I was interested in healing myself naturally.

I knew that I was on the right track with diet, so I started investigating Robb Wolf's Autoimmune Paleo Protocol, and made specific tweaks for skin conditions. Results I had seen from others (Dr. Terry Wahls, for example) who had healed themselves from crippling autoimmune conditions were the only motivation I needed. When I started treating HS like an autoimmune condition, it went into remission. There are literally thousands of cases of this happening with different autoimmune conditions all over the world. I was also able to induce flare-ups with specific experimentation. This completely checks with autoimmunity. There isn't a cure?you will always have the predisposition for autoimmunity?but you CAN go into remission.

3. Do you have any relatives or close friends that became diagnosed after you?

There is no one else in my family with this condition. There is a mistaken belief that HS is hereditary. It is not. However, some families have more than one member affected by it. The reason for this is that HS is autoimmune. In order to get an autoimmune condition, you need to have the gene for autoimmunity. The fact that the autoimmune gene manifests as HS in more than one family member is **complete coincidence**. If you're suffering from HS, you more than likely have other autoimmune conditions - and so does your family. Family trees littered with Crohn's, rheumatoid arthritis, multiple sclerosis, restless legs syndrome, diabetes, Lupus, endometriosis, eczema, psoriasis, HS, and more?all of which are autoimmune?are very common. If you have HS, you have the autoimmune gene, which you *did* inherit. If your gut becomes leaky, then you will eventually develop an autoimmune condition.

4. Do you have advice for anyone seeking medical help for this condition?

Read my book first. The Western medical community is still under the mistaken belief that HS is caused by bacteria, hence the prescriptions for antibiotics. They will not be able to help you, and will suggest butchering surgeries and heavy hitting drugs, which often make matters worse. You can't "cut HS out," like you do with a cancerous tumor. When you remove an organ or tissue that is being ravaged by an autoimmune response, you open up all your other organs and tissues to attack. That's why there's over an 80% chance of reoccurrence of HS after surgery, and people will often start flaring-up in areas that had been clear before. Sometimes, they even develop brand new autoimmune conditions. Luckily, you actually hold the key to healing in your hands. You can heal yourself. If you can avoid infection, then you don't need doctors?or drugs? to help you go into remission.

5. What is the one thing you would stress most to anyone unable to get a copy of your book at this time?

Many people with HS are on disability and don't have a lot of disposable income, or they have been taken advantage of in the past. If this is you, go to your local library and ask them to carry the book. Then, you can

borrow it for free.

How much does a 1-oz jar of EmuAid cost? Turmeric capsules? Surgery? Doctor visits and prescriptions? We've all fallen for so much. I bet if you sat down and tallied up how much you've spent on Band-Aids alone for your HS over the years, \$26 would be a drop in the bucket.

The great thing about this book is that if you are not satisfied, you can request your money back. If you get this 300-page manual and find that there is nothing in it that is of any help, you can ask for a refund from the publisher. Try asking for a refund for EmuAid when it doesn't work. That being said, I would challenge anyone with HS to read this book and find *nothing* in it that's helpful.

6. Your book is a very important first step in making the public aware of this illness. Besides the book, how do you plan to raise awareness of HS?

My goal is to get on the Dr. Oz show. I figure that will give us the biggest bang for the buck. Many people have HS, but are unaware of what it's called. They're too embarrassed to go to the doctor about it. I would encourage all of you to write to the Dr. Oz show and ask them to feature me, and ask your local library to carry the book. The only way we're going to raise awareness is to GO BIG.

From reader reviews:

Alberta Smith:

In this 21st century, people become competitive in every single way. By being competitive today, people have to do something to make all of them survive, being in the middle of the actual crowded place and notice by means of surrounding. One thing that often many people have underestimated the item for a while is reading. Yep, by reading a publication your ability to survive enhance then having chance to stand than other is high. For you personally who want to start reading some sort of book, we give you this The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa book as beginning and daily reading e-book. Why, because this book is more than just a book.

Nancy Martindale:

The particular book The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa will bring that you the new experience of reading the book. The author style to spell out the idea is very unique. In the event you try to find new book to learn, this book very ideal to you. The book The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa is much recommended to you to read. You can also get the e-book through the official web site, so you can more easily to read the book.

Adele Yeager:

This The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa is great book for you because the content which is full of information for you who else always deal with world and also have to make decision every minute. This specific book reveal it information accurately using great arrange word or we can declare no rambling sentences inside it. So if you are read it hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but hard core information with splendid delivering sentences. Having The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa in your hand like getting the world in your arm, data in it is not ridiculous just one. We can say that no guide that offer you world in ten or fifteen moment right but this reserve already do that. So , it is good reading book. Heya Mr. and Mrs. active do you still doubt in which?

Barbara Wheat:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from the book. Book is prepared or printed or created from each source that filled update of news. On this modern era like today, many ways to get information are available for a person. From media social similar to newspaper, magazines, science guide, encyclopedia, reference book, fresh and comic. You can add your understanding by that book. Are you ready to spend your spare time to open your book? Or just trying to find the The Hidden Plague: A Field Guide For Surviving and Overcoming Hidradenitis Suppurativa when you necessary it?
