The Birth of a New Physics (Revised and Updated)

I. Bernard Cohen

The Birth of a New Physics (Revised and Updated) I. Bernard Cohen

The earth circles the sun every year and rotates on its axis every twenty-four hours. The earth does not stand still.

These are notions so basic to our view of life that we take them for granted. But in the seventeenth century they were revolutionary, heretical, even dangerous to the men who formed them. Culture, religion, and science had intertwined over the centuries to create a world view based on a stationary earth. Indeed, if the earth moved, would not birds be blown off the trees and would not an object thrown straight up come down far away?

Then came the Renaissance and with it Copernicus, Galileo, Kepler, Huygens, and Newton: giants who courageously remade the world into an earth which actually moves 100,000 feet a second while revolving 1,000 miles an hour around an object 93,000,000 miles away. And yet birds perch unruffled and an apple will fall straight down.

All of this we think we know. But how well do we know it? In the twenty-five years since its first publication, *The Birth of a New Physics* has become a classic in the history of science. Here expanded by more than one-third and fully updated, it not only offers us the best account of the greatest scientific revolution but also tells us how we can *know* we live in a dynamic universe.

Cynthia Carter:

As we know that book is essential thing to add our knowledge for everything. By a publication we can know everything we want. A book is a range of written, printed, illustrated or blank sheet. Every year seemed to be exactly added. This reserve The Birth of a New Physics (Revised and Updated) was filled about science. Spend your extra time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading a book. If you know how big good thing about a book, you can really feel enjoy to read a e-book. In the modern era like now, many ways to get book which you wanted.

Santa McNabb:

As a university student exactly feel bored in order to reading. If their teacher expected them to go to the library or make summary for some guide, they are complained. Just very little students that has reading's heart and soul or real their interest. They just do what the teacher want, like asked to the library. They go to there but nothing reading very seriously. Any students feel that reading is not important, boring and also can't see colorful photographs on there. Yeah, it is being complicated. Book is very important in your case. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, many ways to reach Chinese's country. Therefore , this The Birth of a New Physics (Revised and Updated) can make you sense more interested to read.

Nancy Figaro:

Reading a publication make you to get more knowledge from that. You can take knowledge and information from the book. Book is composed or printed or illustrated from each source this filled update of news. With this modern era like now, many ways to get information are available for an individual. From media social including newspaper, magazines, science guide, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to spread out your book? Or just in search of the The Birth of a New Physics (Revised and Updated) when you essential it?
