Moons of the Solar System: An Illustrated Encyclopedia

John Stewart

Moons of the Solar System: An Illustrated Encyclopedia John Stewart

The first half of this book is devoted to earth's moon. General statistical data are followed by such subjects as eclipses, spacecraft landings, phenomena, mapping, and the hundreds of small and large surface features with the sources of their names. The second half is about the 70 other known moons of the solar system, with size, discovery date and other data. There are 7 appendices and 62 photographs (18 in color).
