## **Balancing Human Rights, Environmental Protection and International Trade: Lessons from the EU Experience (Studies in International Trade Law) Emily Reid**

This book explores the means by which economic liberalization can be reconciled with human rights and environmental protection in the regulation of international trade. It is primarily concerned with identifying the lessons the international community can learn, specifically in the context of the World Trade Organization, from decades of European Community and EU experience in facing this question. The book demonstrates, first, that it is possible to reconcile the pursuit of economic and non-economic interests, that the EU has found a mechanism by which to do so, and that the application of the principle of proportionality is fundamental to the realization of this. It is argued that the EU approach can be characterized as a practical application of the principle of sustainable development. Second, from the analysis of the EU experience, the book identifies fundamental conditions crucial to achieving this 'reconciliation.' Finally, the book explores the implications of lessons from the EU experience for the international community. In so doing, it assesses both the potential and limits of the existing international regulatory framework for such reconciliation. The book develops a deeper understanding of the inter-relationship between the legal regulation of economic and non-economic development, adding clarity to the debate in a controversial area. It argues that a more holistic approach to the consideration of 'development,' encompassing economic and non-economic concerns -- 'sustainable' development -- is not only desirable in principle, but realizable in practice. (Series: Studies in International Trade Law - Vol. 16) [Subject: Economics, International Law, Trade Law, Human Rights Law, Environmental Law]
