Foreign Policy Analysis is the first textbook to gear foreign policy analysis (FPA) theory toward advanced undergraduate and beginning graduate students. Beginning with an overview of this broad field of study, the book's subsequent chapters tackle theory and research at multiple levels of analysis, including personality and psychology of foreign policy decisionmakers and decisionmaking, small group dynamics, the organizational process, bureaucratic politics, domestic politics, cultural and societal influences on foreign policy, national attributes, and system-level effects on foreign policy. A chapter examining the promise and frustration of theoretical integration in FPA is also incorporated, and the book ends with an analysis of the areas in which the next generation of foreign policy analysts can make important contributions to the field.
