## **Information Technology and Sustainability** Lorenz M. Hilty

Information and Communication Technologies (ICTs) are contributing both to environmental problems and to their solution. Will ICT producers, users and recyclers be the major polluters of tomorrow, or will 'Green IT' and a dematerialized information society save the climate? This book provides an in-depth analysis of the relationship between ICT and sustainable development, culminating in 15 recommendations - to producers, users and political decision makers - which show the way to a sustainable information society. Keywords: Information Technology, Environment, Sustainable Development, Environmental Informatics, Green IT, Green Computing, Data Centers, Energy Efficiency, Resource Productivity, Dematerialization, Life Cycle Assessment (LCA), E-waste, Waste Electrical and Electronic Equipment (WEEE), Recycling, Technological Complexity, Critical Information Infrastructure, Open Standards, Rebound Effect.

**Michael Robinson:**

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some reserve, they are complained. Just small students that has reading's soul or real their passion. They just do what the trainer want, like asked to the library. They go to there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Information Technology and Sustainability can make you feel more interested to read.
