*Movies in American History: An Encyclopedia* is a reference text focused on the relationship between American society and movies and filmmaking in the United States from the late 19th century through the present. Beyond discussing many important American films ranging from *Birth of a Nation* to *Star Wars* to the *Harry Potter* film series, the essays included in the volumes explore sensitive issues in cinema related to race, class, and gender, authored by international scholars who provide unique perspectives on American cinema and history.

Written by a diverse group of distinguished scholars with backgrounds in history, film studies, culture studies, science, religion, and politics, this reference guide will appeal to readers new to cinema studies as well as film experts. Each encyclopedic entry provides data about the film, an explanation of the film's cultural significance and influence, information about significant individuals involved with that work, and resources for further study.
