## **Lung and Mediastinum Cytohistology with CD-ROM (Cytohistology of Small Tissue Samples)**

Each volume in this richly illustrated series, sponsored by the Papanicolaou Society of Cytopathology, provides an organ-based approach to the cytological and histological diagnosis of small tissue samples. Benign, pre-malignant and malignant entities are presented in a well-organized and standardized format, with high-resolution color photomicrographs, tables, tabulated specific morphologic criteria and appropriate ancillary testing algorithms. Example vignettes allow the reader to assimilate the diagnostic principles in a case-based format. This volume provides comprehensive coverage of lung and mediastinal cytopathology. It presents a correlation of findings from fine-needle aspiration and exfoliative cytology and histologic findings obtained via core needle biopsies and surgical specimens. With a focus on malignant tumors, the full spectrum of inflammatory disorders, infectious diseases, hyperplasias and benign tumor or tumor-like lesions are also covered in detail. With over 500 printed photomicrographs and a CD-ROM offering all images in a downloadable format, this is an important resource for all anatomic pathologists.
