Managing Mobile Services: Technologies and Business Practices

Managing Mobile Services: Technologies and Business Practices

New, attractive services for communications systems are versatile and promise to make the next generation of communications a success. Yet, as the systems grow more complex and diverse, so do the challenges of managing them.

Service management derives from technologies used in fixed telephony systems and has evolved towards supporting packet-based services in an increasingly open environment. It is common belief that 3G (and later 4G) services will change the way we communicate and interrelate. The user will be put at centre stage and systems will be able to handle intelligent user profiles, proactive service selection, context-aware service provisioning and ubiquitous computing. Managing, charging for, and controlling these services render traditional business models inadequate and demand new solutions.

Managing Mobile Services

- Covers challenges, solutions and technologies for implementing IP-based services in a mobile environment, with special attention to security, flexibility and charging.
- Discusses business models, service management architectures and standardization efforts.
- Considers requirements and characteristics of services, and service modelling.
- Includes two case studies illustrating the challenges, technologies and solutions involved with real-world service management.

This book gives telecommunications/data engineers, operators and service providers as well as students and academics an in-depth understanding of the issues involved in implementing and managing new value-added services.

The Enjoyable agreement here cannot be questionable, like treasuring beautiful island. Use you still want to miss the idea? Find this book and read it from at this point!

Elaine Rochelle:

As a pupil exactly feel bored to be able to reading. If their teacher requested them to go to the library or even make summary for some e-book, they are complained. Just little students that has reading's internal or real their pastime. They just do what the professor want, like asked to the library. They go to there but nothing reading very seriously. Any students feel that examining is not important, boring as well as can't see colorful pics on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this time, many ways to get whatever you want. Likewise word says, many ways to reach Chinese's country. So ,

this Managing Mobile Services: Technologies and Business Practices can make you really feel more interested to read.
