Mary Helen Immordino-Yang

Emotions, Learning, and the Brain: Exploring the Educational Implications of Affective Neuroscience (The Norton Series on the Social Neuroscience of Education) Mary Helen Immordino-Yang

An orientation to affective neuroscience as it relates to educators.

In this ground-breaking collection, Mary Helen Immordino-Yang—an affective neuroscientist, human development psychologist, and former public school teacher—presents a decade of work with the potential to revolutionize educational theory and practice by deeply enriching our understanding of the complex connection between emotion and learning.

With her signature talent for explaining and interpreting neuroscientific findings in practical, teacher-relevant terms, Immordino-Yang offers two simple but profound ideas: first, that emotions are such powerful motivators of learning because they activate brain mechanisms that originally evolved to manage our basic survival; and second, that meaningful thinking and learning are inherently emotional, because we only think deeply about things we care about. Together, these insights suggest that in order to motivate students for academic learning, produce deep understanding, and ensure the transfer of educational experiences into real-world skills and careers, educators must find ways to leverage the emotional aspects of learning.

Immordino-Yang has both the gift for captivating readers with her research and the ability to connect this research to everyday learning and teaching. She examines true stories of learning success with relentless curiosity and an illuminating mixture of the scientific and the human.

What are feelings, and how does the brain support them? What role do feelings play in the brain's learning process? This book unpacks these crucial questions and many more, including the neurobiological, developmental, and evolutionary origins of creativity, facts and myths about mirror neurons, and how the perspective of social and affective neuroscience can inform the design of learning technologies.

From reader reviews:

Joseph McNeal:

Now a day people that Living in the era everywhere everything reachable by interact with the internet and the resources included can be true or not require people to be aware of each details they get. How individuals to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Reading a book can help individuals out of this uncertainty Information specifically this Emotions, Learning, and the Brain: Exploring the Educational Implications of Affective Neuroscience (The Norton Series on the Social Neuroscience of Education) book since this book offers you rich information and knowledge. Of course the knowledge in this book hundred % guarantees there is no doubt in it you know.

Edward Torres:

This book untitled Emotions, Learning, and the Brain: Exploring the Educational Implications of Affective Neuroscience (The Norton Series on the Social Neuroscience of Education) to be one of several books in which best seller in this year, this is because when you read this guide you can get a lot of benefit on it. You will easily to buy that book in the book shop or you can order it by means of online. The publisher on this book sells the e-book too. It makes you more easily to read this book, because you can read this book in your Mobile phone. So there is no reason for you to past this guide from your list.

Tammy Booker:

Playing with family in a very park, coming to see the sea world or hanging out with pals is thing that usually you will have done when you have spare time, in that case why you don't try factor that really opposite from that. Just one activity that make you not feeling tired but still relaxing, trilling like on roller coaster you are ride on and with addition of knowledge. Even you love Emotions, Learning, and the Brain: Exploring the Educational Implications of Affective Neuroscience (The Norton Series on the Social Neuroscience of Education), you may enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh seriously its mind hangout folks. What? Still don't understand it, oh come on its known as reading friends.

David Baker:

Emotions, Learning, and the Brain: Exploring the Educational Implications of Affective Neuroscience (The Norton Series on the Social Neuroscience of Education) can be one of your basic books that are good idea. We recommend that straight away because this e-book has good vocabulary that may increase your knowledge in vocabulary, easy to understand, bit entertaining but still delivering the information. The writer giving his/her effort to get every word into delight arrangement in writing Emotions, Learning, and the Brain: Exploring the Educational Implications of Affective Neuroscience (The Norton Series on the Social Neuroscience of Education) but doesn't forget the main point, giving the reader the hottest along with based

confirm resource information that maybe you can be among it. This great information may drawn you into completely new stage of crucial imagining.
